EDUCATION

PSG College of Arts & Science, Coimbatore *Aug 2024 – May 2026*
Master of Computer Applications (MCA) *CGPA: 8.6 /10*

PSG College of Arts & Science, Coimbatore *Aug 2021 – May 2024*
Bachelor of Vocational Studies (B.Voc), Networking & Mobile Applications *CGPA: 8.6 /10*

EXPERIENCE

Data Analyst Intern *Jan 2026 – Apr 2026*
Kovaion Consulting, Coimbatore

- Collected and recorded **1,000+ song records** from Spotify based on predefined genre criteria, manually entering metadata and validating records for data accuracy before submission.
- Took on an additional **credit risk prediction project**, developing a borrower default prediction model using Python and feature engineering that achieved **93% accuracy and 0.94 ROC-AUC** across 32,581 records.
- Built an **LLM-based Natural Language MongoDB Query Engine** enabling non-technical stakeholders to retrieve data through plain-English questions without writing MongoDB queries.
- Built a **CRM Analytics Query System** using MongoDB, enabling sales users to retrieve and analyze lead data through natural-language questions.

PROJECTS

ENTERPRISE GTM RESEARCH| GTM STRATEGY & BUSINESS RESEARCH *Clay, Lovable, AI Research*
Live Project

- Conducted end-to-end GTM research on a real enterprise company, evaluating its ICP fit, AI adoption, governance maturity, business context, and potential buying signals.
- Researched and mapped relevant stakeholders, account priorities, and qualification signals to understand where and how the company could be approached.
- Built a structured, repeatable GTM research workflow using AI, Clay and Lovable to organize account research, qualification, stakeholder mapping, and insights into an interactive case study.

CREDIT RISK PREDICTION | DECISION SUPPORT ANALYTICS *Python, Scikit-learn, Pandas, Streamlit*
GitHub | Live Demo

- Developed a machine learning application for borrower risk prediction using historical loan data, achieving **93% prediction accuracy** and a **0.94 ROC-AUC score** across 32,581 borrower records.
- Identified loan-to-income ratio as the strongest default indicator through feature importance analysis and deployed the solution using Streamlit for interactive credit risk assessment.

NEXACV | AI RESUME ANALYSIS & ATS OPTIMIZATION *Python, Flask, LLM (Groq LLaMA-3), spaCy, pdfplumber*
GitHub

- Developed an AI-powered resume analysis platform that evaluates resumes against job descriptions using weighted ATS scoring across skills, experience, education, and keyword alignment.
- Integrated LLM-based recommendations using Groq LLaMA-3 to identify skill gaps and generate personalized resume improvement suggestions through natural language feedback.

SALES ANALYTICS DASHBOARD | BUSINESS INTELLIGENCE & KPI REPORTING *Python, Power BI, Pandas, Matplotlib*
GitHub

- Analyzed 12 months of retail sales data using Python to identify revenue trends, purchasing behavior, geographic performance, and product combinations for business reporting.
- Built an interactive Power BI dashboard with KPI reporting across sales, geography, and customer purchasing patterns, highlighting a **$4.61M December revenue peak** to support business decision-making.

SKILLS

Go-To-Market: Ideal Customer Profile (ICP) Development, Enterprise Account Research, Target Account Qualification, Market Research, Buying Signal Analysis, Stakeholder Mapping, GTM Strategy, AI Adoption Research

Business Analytics: SQL, Excel, Power BI, Dashboard Development, KPI Reporting, Business Intelligence, Exploratory Data Analysis (EDA), Data Visualization

AI & LLM Applications: LLMs (Groq LLaMA-3), Prompt Engineering, AI Research, LLM Application Development, Lovable, Groq API

Programming & Tools: Python, FastAPI, Flask, MongoDB, Pandas, Matplotlib, Scikit-learn, Streamlit, Clay, Git, GitHub

CERTIFICATIONS

- **Accenture North America Data Analytics and Visualization Job Simulation – Forage** *Dec 2024* | Certificate
